

Coronavirus (COVID-19) catch-up premium

During the academic year 2020-21 Wray Primary School will receive a grant to support pupils who need extra support after having a break from education during the coronavirus pandemic. For more information on this please go to

<https://www.gov.uk/guidance/coronavirus-covid-19-catch-up-premium>

At Wray Primary School the funding will be used to support children on a 1:1 basis and also in small groups, on occasions it may also be used to support children more closely in class. Children have been identified by the class teachers in consultation with the Head teacher. The children were chosen based on assessments made by the class teachers on their return to school in September 2020. Those chosen were identified as not making the progress that the teacher would have expected with particular focus on pupils who had previously, but may now not be, on track to meet the 'expected standard' for their year group. The funding will be used to provide extra Teaching Assistant hours using staff already working in school who know the pupils. The main areas of focus for the sessions will be reading, writing and maths and also a specific intervention to address the social needs of children who may need extra help interacting with their peers.

Over the year 2020-2021 these pupils will be carefully monitored through the school's tracking system and also through termly pupil progress meeting between the Head teacher and the class teachers.
